0.64 | Spit Bridge

The Spit Bridge was originally built in 1924 to replace the punt service. The current Spit Bridge was built during the 1950's. The bridge is a bascule bridge, as it's middle section can be raised to allow tall ships through. This ability of the bridge does, however, stop traffic on a major arterial road, which has caused the bridge to be the centre of some controversy. The Spit Bridge carries the Spit Rd and the Manly Scenic Walkway.
